

PROFESSIONAL SUMMARY

Detail-oriented Software Test Engineer with 2.4 years of experience in Manual Testing. Proficient in Automation Testing, Database Testing, API Testing. Adept at designing test cases, identifying bugs, and ensuring software quality. Seeking to leverage my expertise to contribute to the success of a dynamic team.

SKILLS AND TOOLS

- **Programming Languages:** Python
- **Automation Testing:** Selenium Webdriver
- **Database:** SQL
- **API Testing:** RESTful API, Postman
- **Test Management Tools:** JIRA, Testrail

PROFESSIONAL EXPERIENCE

- 2.4 years of Experience in Software Testing
- Good exposure in **SDLC (Software Development Life Cycle) concepts**
- Excellent in **Smoke testing, Functional Testing, Integration Testing, System Testing**
- Strong in writing **Test scenarios and Test cases**
- Experience on **Test Execution using Testrail**
- Experience on defect tracking tool - **Jira**
- Very good knowledge on **Compatibility Testing, Adhoc Testing and Regression Testing**
- Very good knowledge in **Exploratory Testing, Usability and Performance Testing**
- Hands-on experience in **Test Case Design Techniques**
- Good Exposure in **STLC (Software Test Life Cycle)**
- Strong knowledge on **Defect Life Cycle.**
- Worked in **Agile Methodology and participated in Scrum Ceremonies**
- Excellent problem-solving and analytical abilities
- Strong communication and collaboration skills

TECHNICAL SKILLS

API TESTING

- Hands-on experience in **API testing using Postman.**
- Very good experience in performing **CRUD operations for various APIs.**
- Better understanding of **SOAP an REST web service testing.**
- Knowledge of writing API test cases.

DATABASE TESTING

- Good understanding in **Functions, sub queries**
- Strong knowledge on **SQL Joins**
- Knowledge on SQL concepts like **data type, constraints, and SQL commands**

- good knowledge of **DDL, DML, TCL**

WORKING EXPERIENCE

July 2022 - Present

TSD Corporation Ltd

Domain: CRM
Role: Test Engineer

Project Description

This application used to manage interactions with customers and potential customers and also used for managing sales and marketing in a single system. From managing an account's contact information to staying up to date with business deals, payments, and reports. It helps B2B companies to create a common platform to keep their partners, vendors, and other stakeholders of their business in sync with each other.

Responsibilities

- Analyzed project requirements and created detailed test cases to ensure comprehensive test coverage.
- Executed various types of testing, including functional, regression, integration, and smoke testing, to validate application behavior.
- Performed cross-browser and cross-device testing to ensure application compatibility across different platforms.
- Utilized exploratory testing techniques to uncover edge cases and ensure a more robust application.
- Checked the status of every issue across each modules day to day and update the team lead on daily basis through emails and status trackers & Daily Stand-up Meeting
- Collaborated closely with the development team to perform root cause analysis for defects and provided detailed bug reports with steps to reproduce
- Peer-reviewed all test cases and scenarios to ensure they adequately cover the system requirements
- Tracked and managed defects using JIRA and worked closely with developers to ensure timely resolution.
- Participated in requirement review sessions to identify potential gaps and inconsistencies early in the development cycle.

Bug Tracking Test Scripts Test Case Execution Regression Testing Agile Rest Webservice CI/CD

Qualifications

B.Tech in Information Technology from Central University, Bilaspur.
